

Students' Expectation and Satisfaction Survey

An expectation – Satisfaction Survey was conducted among the students to understand their expectation from the campus life along with the measurement of level of satisfaction they experience after being part of the institution. The details of the survey are given below.

Expectation Survey

The expectation survey measured major five areas of expectations of students while joining the college. The detailed findings are given below

1. Motivation to join the college

21 percent of students were motivated by the previous academic achievements of the college about which they were aware. 23 percent were prompted by the proximity to the college and 48.6 percent of students did not have any specific reason for choosing the college. The facility for coeducation and the maintenance of discipline in the college motivated 3.6 and 2.9 percent students respectively.

2. Reason for choosing the programme

Preference and demand of the programme was the major reason for choosing the programme to which they are admitted in the college. 46.4 percent said that demand of the programme as the reason and 23.9 percent did not have any other option. 18.8 percent were influenced by parents/friends in choosing the programme.

3. First experience in the college

32.6 percent consider their first experience as good and 30.4 percent perceive the experience as average and 36.9 percent of students consider their first experience as not so good.

4. Expectations from the college

37.7 percent of students expected a student friendly and vibrant campus and 20.3 percent expected that the campus would contribute to their all round development. Formation for life and career was anticipated by 20.3 percent and 15.2 percent of students had the expectation that their level of skills and knowledge would be enhanced.

5. Type of activities, opportunities and exposure

49.3 percent of students expected academic activities and opportunities from the college, 17.4 percent expected development of their soft skills, 15.2 percent expected exposure in sports and 11.6 percent expected opportunities for cultural activities also. This shows diverse expectations from the students about the college in which they choose to study.

Satisfaction Survey
